

What I should already know

- Plants can grow.
- Some trees lose their leaves in the Autumn and Winter.
- There are different types of flowers.
- You need to water plants.

At the end of this topic, I will know:

- The names of a variety of common wild and garden plants, including deciduous and evergreen trees.
- How to label the flower/fruits, leaves, stem and root on a common plant.
- How to label the leaves, branches, trunk, crown and root on a tree.

Common Flowers

Tulip

Rose

Poppy

Sunflower

Wildflowers

Dandelion

Nettle

Daisy

Buttercup

Key Facts:

Deciduous trees lose their leaves in the autumn every year.

Evergreen trees have green leaves all year round.

A wild plant will grow by itself, it does not need to be cared for. If it grows somewhere unwanted, it may be a weed.

Vocabulary

leaf	These are flat, thin and usually green.
flower	The part of a plant that is often brightly coloured.
petal	Thin, brightly coloured or white part of the flower.
fruit	Fleshy part of a plant that contains seeds or a stone.
