Additional Information
<p>Actions based on research:</p> <p>The Sutton Trust Teaching and Learning Toolkit considers a wide range of common approaches and strategies to raising achievement. It analyses them based on a range of evidence in order to identify the high impact approaches alongside the implications. This action plan is based on the some of the higher impact strategies identified by the Sutton Trust and the Ofsted document ‘The Pupil Premium: How schools</p>

are spending the funding successfully to maximise achievement' so that we can be confident that we are using interventions and approaches with a track record of success.

A wide variety of strategies are employed to tackle 'the opportunity gap' in education and to raise attainment for the children from disadvantaged backgrounds. For example:

- rigorous monitoring and use of data;
- deploying staff and resources effectively;
- employing intervention programmes;
- raising pupil aspirations using engagement/aspiration programmes;
- focussing on pupils' attitude to learning;
- engaging parents/carers;
- developing social and emotional competencies;
- supporting school transitions;
- Guided and reciprocal reading
- one-to-one tutoring by parent volunteers, particularly in reading;
- CPD to encourage quality first teaching.

Undoubtedly, the quality of teaching delivers the greatest improvements in learning outcomes for all pupils, including those from deprived backgrounds. The most powerful approaches are well-specified, well-supported and well-implemented programmes of work, incorporating extensive continuing professional development that is often delivered within the school context. Intervention and specific tutoring of individuals/groups by Teachers and Teaching Assistants builds confidence, fills gaps in learning and consolidates which has resulted in pupils making good or better progress by the end of Key Stage 2. From a low baseline, most pupils reach ARE by the time they leave school

Wherever possible, School uses collaborative learning strategies effectively to encourage pupils to develop the necessary social and communication skills to learn.

The school adopts a variety of synchronised approaches, long-term, planned and co-ordinated provision to enable all children to experience success and achieve. Various studies (for example, The Sutton Trust) have considered and evaluated different strategies, and although useful, as it explains it is a "supplement rather than a substitute for professional judgement". Undoubtedly, strategies are most successful when confident, well-trained adults use programmes that meet the needs of individual pupils and circumstances of the school.
