20 APPS PARENTS & CARERS NEED TO KNOW

www.SocialWorkersToolbox.com

<p>Snapchat Messages and photos disappear. Children can be pressured to send images because they believe they will not be saved. Location sharing can show where a child is in real time.</p>	<p>Roblox Although it looks like a children's game, it includes chat features. Children can be contacted by strangers and slowly groomed through friendly game play.</p>	<p>Kik Messenger Accounts can be anonymous. It is often used to move conversations away from apps parents may check.</p>	<p>Fortnite Voice chat allows children to talk to strangers during games. Language and behaviour are often inappropriate.</p>
<p>TikTok Children can see adult content, receive sexual comments, and be contacted by strangers. Live videos allow real-time interaction, which can quickly become unsafe.</p>	<p>Telegram Messages and groups are encrypted, making them difficult to monitor. It is used to share sexual images, harmful material, and to keep conversations hidden from adults.</p>	<p>Hoop The app connects directly to Snapchat and encourages children to add new contacts quickly, including people they have never met.</p>	<p>Reddit Children can easily access sexual, violent, or extreme material through posts and comments.</p>
<p>Instagram Messages allow strangers to contact children directly. Many children run secondary accounts that parents do not know about. There is strong pressure around appearance and popularity.</p>	<p>OmeTV Random video chats with strangers. No effective safeguarding. Sexual content and adult behaviour are common. Children have no control over who appears on screen.</p>	<p>LiveMe Children can broadcast themselves live to anyone watching. Viewers can comment in real time, including adults.</p>	<p>BeReal The app prompts children to take photos instantly, which can lead to oversharing without thinking about safety.</p>
<p>WhatsApp Private chats and group chats are often used for school or friendship groups, but bullying, exclusion, and sharing of images can happen quickly and spread widely.</p>	<p>Yubo The app is designed to meet new people. Children can live stream and chat with strangers, which can quickly become sexual or exploitative.</p>	<p>Calculator+ These apps look like calculators but are used to hide photos, videos, and messages from parents and carers.</p>	<p>Twitch Children watch and interact with live streamers through chat, which often includes adults and unmoderated comments.</p>
<p>Discord Children join private chat servers linked to gaming or interests. These spaces are often unmoderated and can include adults, sexual content, or harmful language.</p>	<p>Monkey Children are placed into random video chats with people they do not know. They have no control over who appears on screen.</p>	<p>YouTube Children can be exposed to adult content through suggested videos, comments, and live streams, even when watching innocent clips.</p>	<p>Bumble This is a dating app. Despite age limits, some under-18s access it to talk to adults looking for relationships.</p>
