

# **St Peter's Catholic Primary School**

## **Accessibility Policy 2018-2019**

At St Peter's Catholic Primary School pupils are entitled to education regardless of gender, race or ability. This links in with the Christian ethos of the school. All pupils are valued and supported to achieve their full potential.

## **Accessibility Strategy**

LA accessibility strategy states that:

"Our vision is that every school will be able to offer a more inclusive learning environment which gives children with different needs the opportunity to learn together."

"An accessible school is one in which disabled pupils are able to participate fully in the school curriculum. It is also one where the physical environment does not limit pupils' ability to take advantage of the education (and other) opportunities on offer."

The SEN and Disability Act 2001 define disability as follows: "A person has a disability if he or she has a physical or mental impairment that has a substantial and long term adverse-effect on his or her ability to carry out normal day to day activities."

There are 3 main areas which the LA and Schools are required to address.

1. Access to the physical environment of the schools.
2. Facilitating access for disabled pupils to the school curriculum.
3. Improving the delivery of written information to pupils with a disability.

## **Access to the Physical Environment of the School**

The building offers access for pupils via two doors (Key Stage 1 and Key Stage 2). The main entrance is situated at the front of the building. For pupils or adults needing wheelchair access there are ramps to the main entrance and other doors. There are no steps within the building. There is a disabled toilet wide enough to accommodate a wheelchair in the medical room. The shared and corridor areas are kept clear of clutter so that pupils or adults with mobility difficulties can move around the building safely and easily.

## **Increasing Access to School Curriculum for Pupils with a Disability**

The SEN register of the school ensures that staff are aware of the degrees of difficulty experienced by children with physical and medical needs. This is recorded as follows:-

- a) School Medical Register (low levels of need).
- b) Person Centred Plans / Health Care Plans (medium levels of need).
- c) Additional Support Plan/ Health Care Plan with support/funding (high levels of need).
- d) Statutory Assessment/Education and Health Care Plan (very high levels of need).

The School Nurse is involved with children on the medical register as and when necessary. Individual Health Care Plans are written if appropriate and all Staff are made aware of pupils with specific problems who may need speedy intervention if a problem arises.

Children with asthma bring their inhalers to school and these are kept with their class teachers. A list of these pupils is kept in the class register. Children with extreme allergies requiring epi-pens keep their medication nearby in line with their health care plans. Medication which needs to be administered to pupils is dispensed in accordance with 'The Medicines Policy'. Parents/carers are consulted about pupils needs.

Staff are alerted to the needs of children with vision/hearing difficulties. Where possible, and necessary, children needing to be seated close to the white board or adjacent to the teacher are positioned accordingly. Support is also given via the LA Vision/Hearing Impaired Service. The computer suite, classroom based computers, laptops etc are used to allow pupils to access the curriculum.

Support is also given to pupils with EAL. Expert help is provided by the staff under the guidance of MEAS.

Support Assistants are used to provide small group teaching and support for pupils at where this is deemed appropriate and in accordance with the school budget. Children with additional needs may be reviewed by health care professionals, and educational psychologist, or by a teacher from SENAAT in conjunction with the Class teacher and SENCO. With regard to budgeting considerations, these children are given additional support where possible.

Individual person centred plans and additional support plans are updated and reviewed termly. A copy is sent home for parent's approval and discussions with class teachers will take place if changes are necessary.

SENAAT also provides screening and additional support for conditions such as dyslexia.

### **Improving the Delivery of Written Information to Pupils with a Disability**

Staff will deliver the curriculum and take note of any pupils with disability or SEN. This is recorded in the planning in differentiated activity or levels of support. Computer and whiteboard programmes are used to display information to pupils. Resources are available for pupils with SpLD e.g.as coloured reading strips for pupils at risk of dyslexia. Staff have received training in the management and teaching of pupils on the Autistic Spectrum. All Staff receive appropriate training so that they display confidence in teaching and supporting disabled pupils with a range of needs. Disabled pupils are encouraged, guided and supported to take part in the full life of the school. Parents of children with a disability need to be consulted and brought into the planning of provision made for their children. It is our policy to discuss with children and parents any needs they have and listen to responses. We gather information about parents' needs.

We negotiate Health Care Plans with parents and professional as appropriate. Individual Plans are then set up accordingly.

Adopted Summer 2016

To be reviewed Summer 2019

## School Accessibility Plan 2016-2019

### Improving the Physical Access at St Peter's Catholic Primary School

Priority	Action	Timescale	Cost
Pedestrian Access	Pedestrian gate to be installed for access to main office . Grab handles to be appropriately placed	2016	£5000
